# ChemStudio PLUS Touch

## 高敏感高解析度CCD

- 壽命長
- 敏感度超越壓片
- 810萬畫素

## 15.6吋觸控電腦

- 直覺式操控介面
- 巨集一鍵完成影像擷取

## 內建RGB螢光/白光模組

## 全自動濾鏡盤

- 5個濾鏡孔, 可自由選配多種濾鏡
- 一鍵輕鬆切換

## 下方光源模組

- 全平面UV BOX(302nm)
- 全平面白光板 (選配)

## 安全門保護裝置

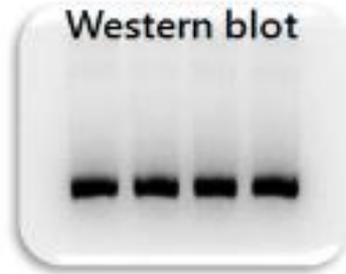

- 當門未關緊時, UV燈將無法開啟, 保護使用者的操作安全

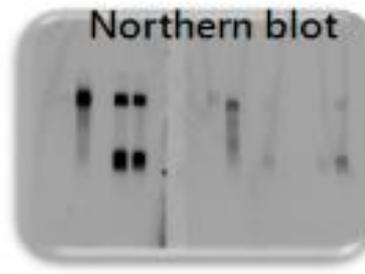

# 產品應用

Chemiluminescence

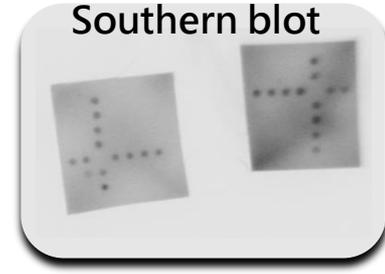

Western blot

Northern blot

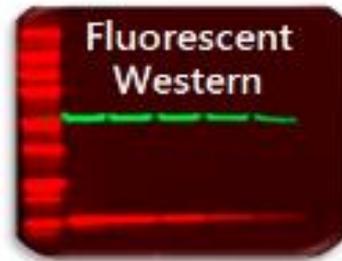

Southern blot

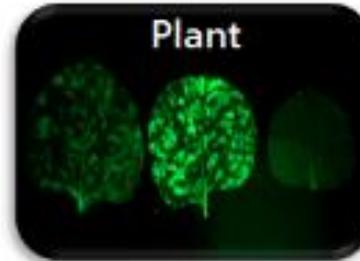

Fluorescent

Fluorescent  
Western

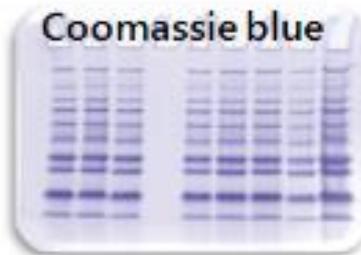

Plant

Visible light  
imaging

Coomassie blue

Colony plate

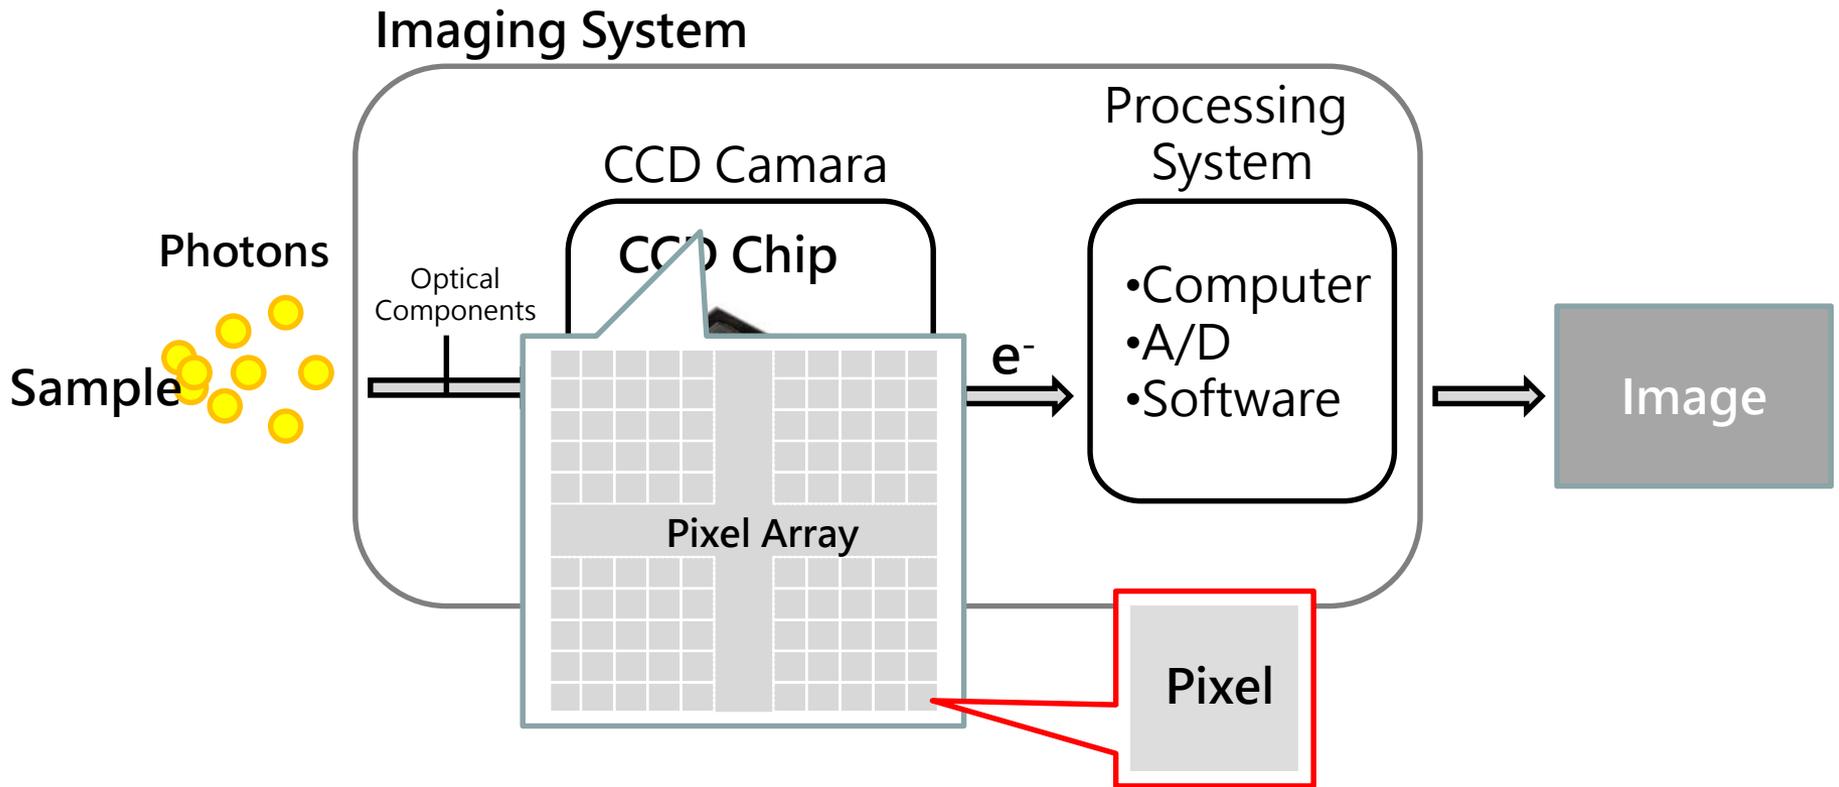

X-ray film

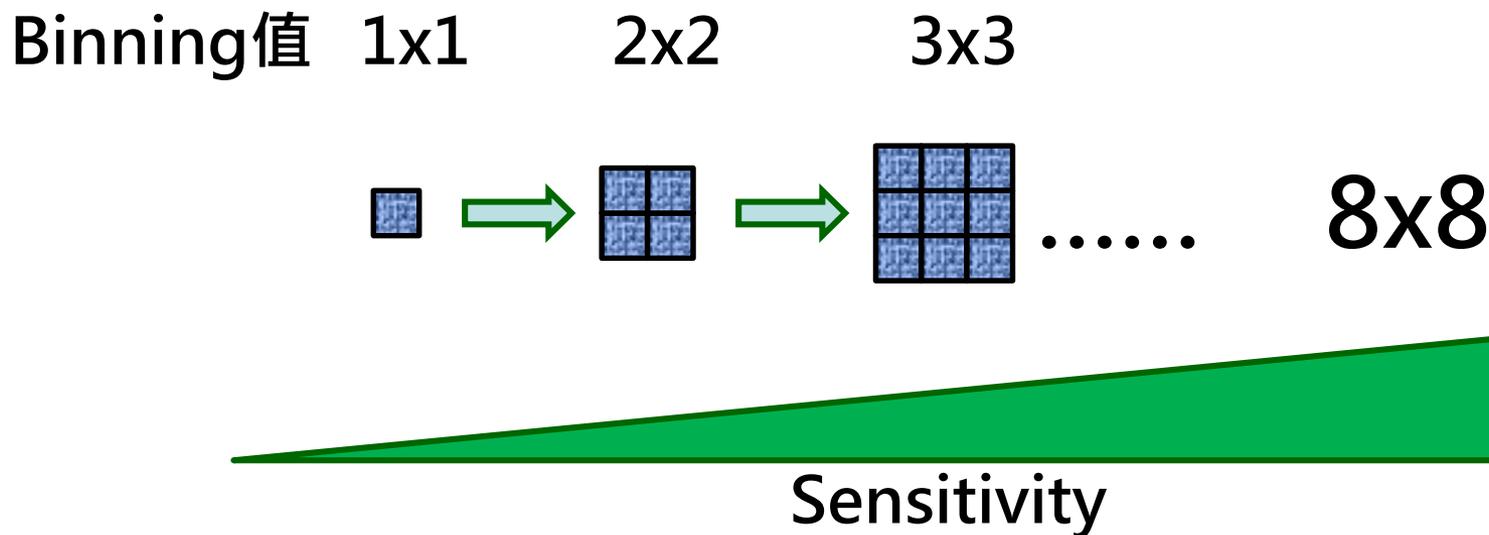

•主要應用涵蓋冷光/多重螢光與可見光影像,甚至是活體影像(植物葉片)

# Principle of CCD imaging system

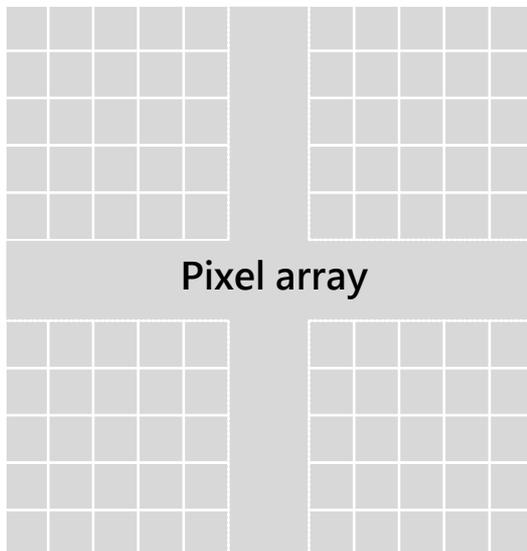

# Binning模式

- ✓ 使用時機:當訊號微弱時，可以調整Binning值來增加敏感度
- ✓ 高畫素CCD兼顧敏感度及解析度!!!

# 光源訊號充足 vs. 訊號微弱

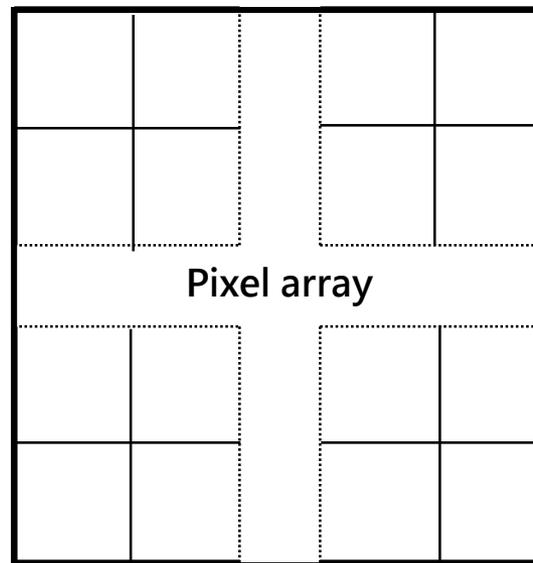

Low Binning

High resolution

Application: White Light Applications

High Binning

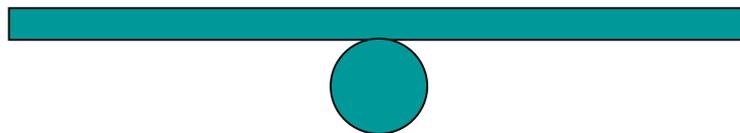

High sensitivity

Application: Luminescence

Resolution

Sensitivity

# 產品介紹-軟體VisionWorks

1. 同一個軟體具有**拍攝與分析**功能。

2. 拍攝：

- ◆ 自動與手動模式
- ◆ 影像優化(自動灰階、套色、反白)
- ◆ UVP數位影像系統專用軟體 (VisionWorks)

**支援 FDA 21 CFR Part 11**規範，自動記錄影像修改紀錄與拍攝參數。

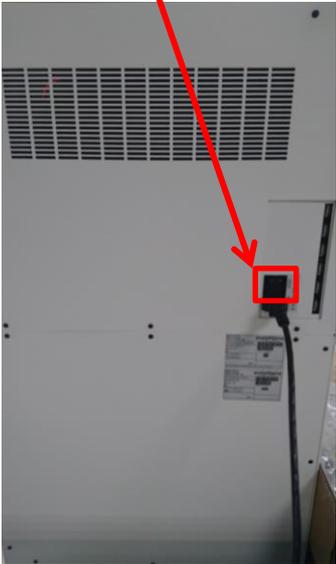

3. 分析：

- ◆ 1D分析：適用膠體電泳，可進行訊號強度分析、分子量及濃度估算。
- ◆ Area Density(AD)分析：適用Western blot，可進行訊號強度分析。
- ◆ Colony Counting(CC)分析：可進行菌落數計算。

# 開機步驟

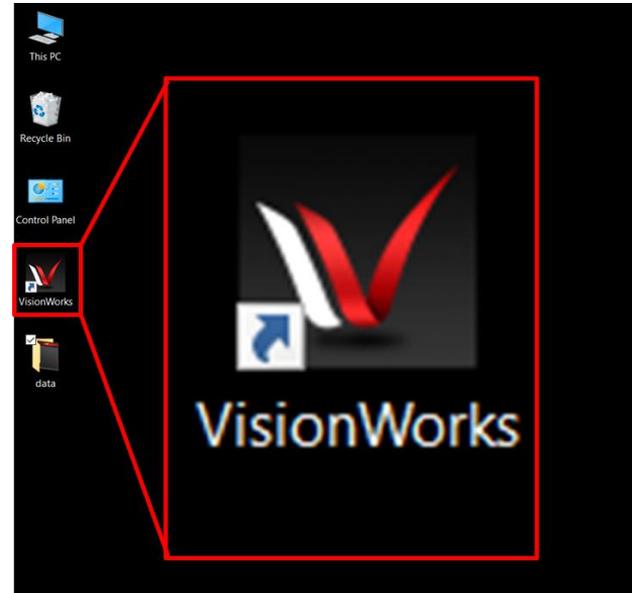

1. 開啟總電源

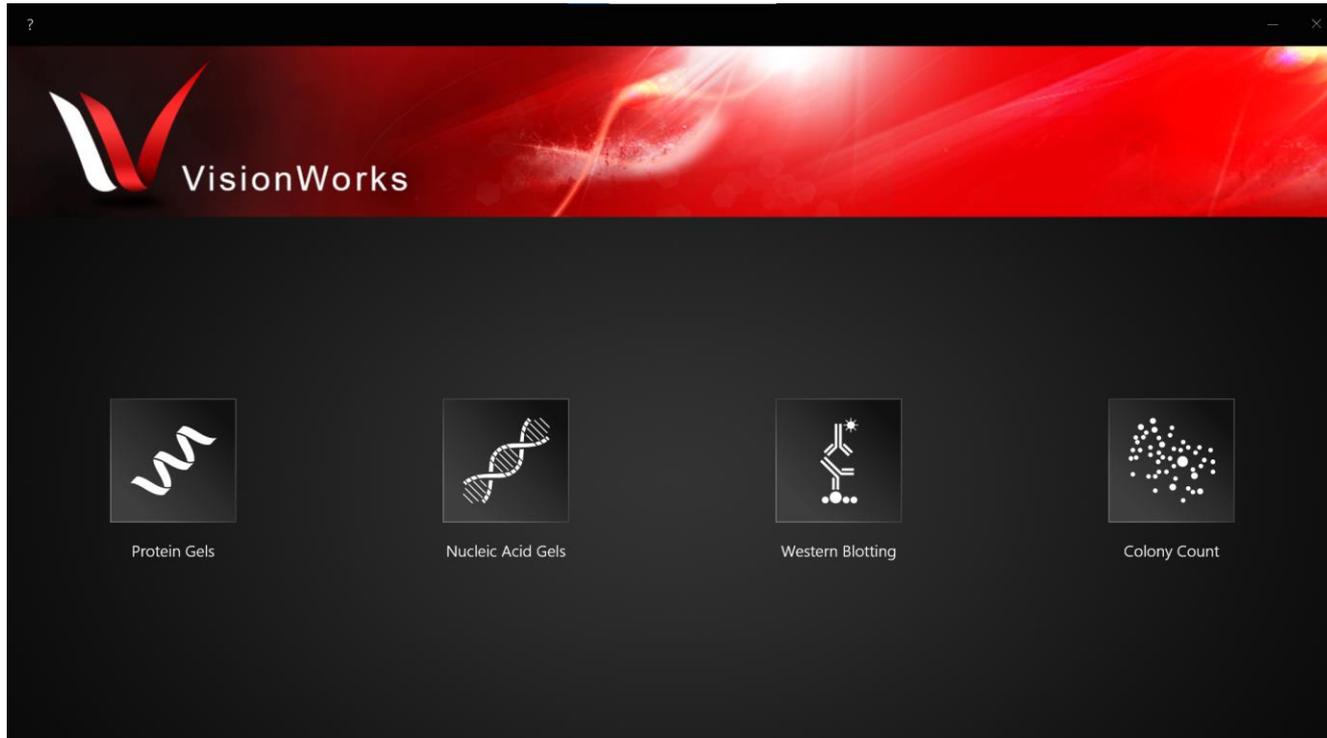

2. 開啟電腦

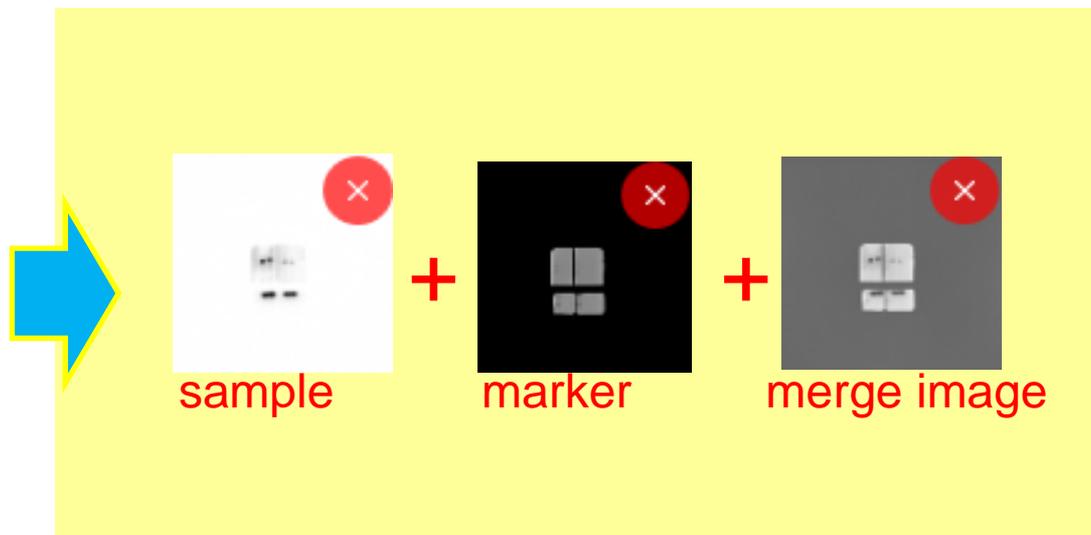

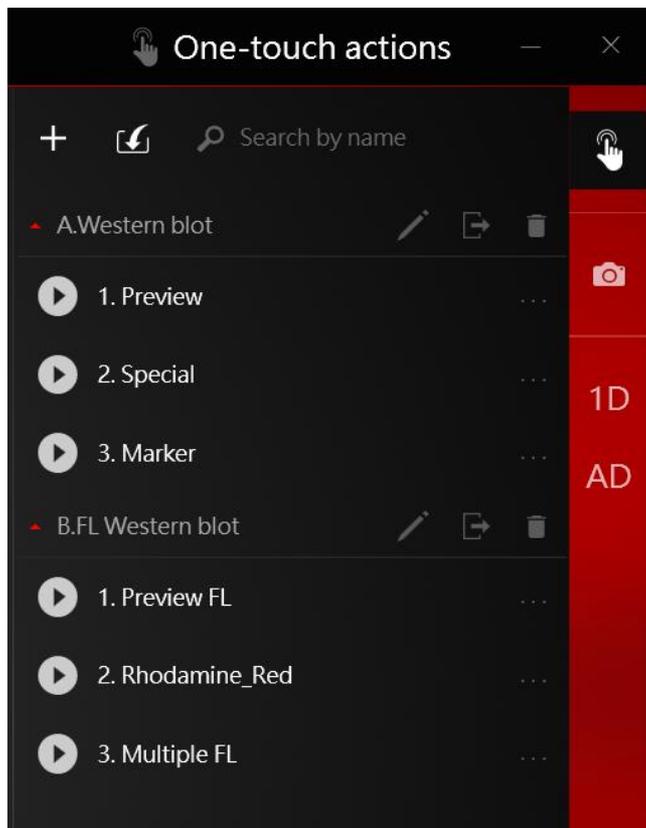

3. 開啟VisionWorks軟體

# 主畫面選單

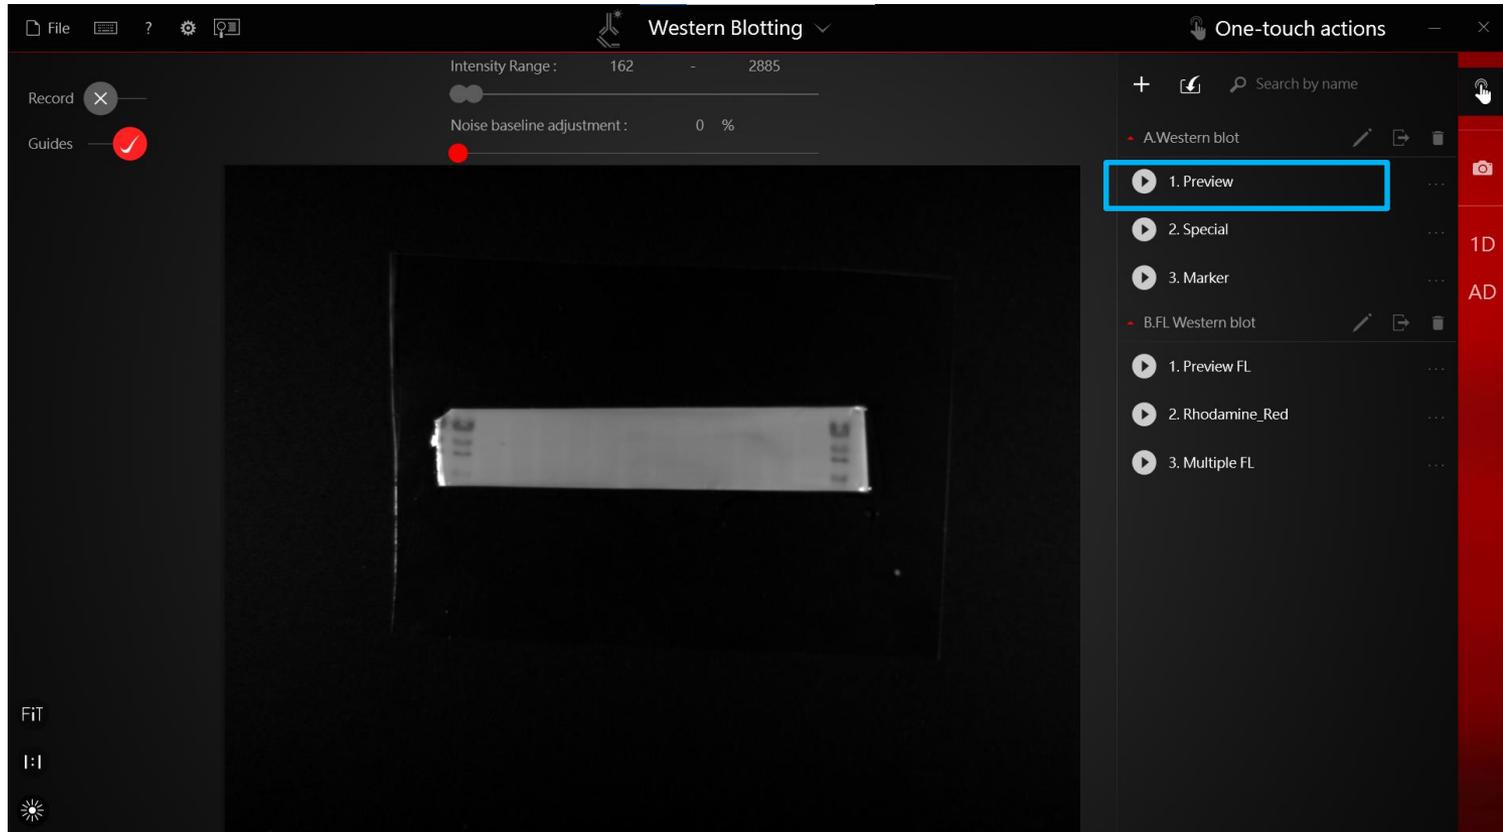

# 冷光拍攝

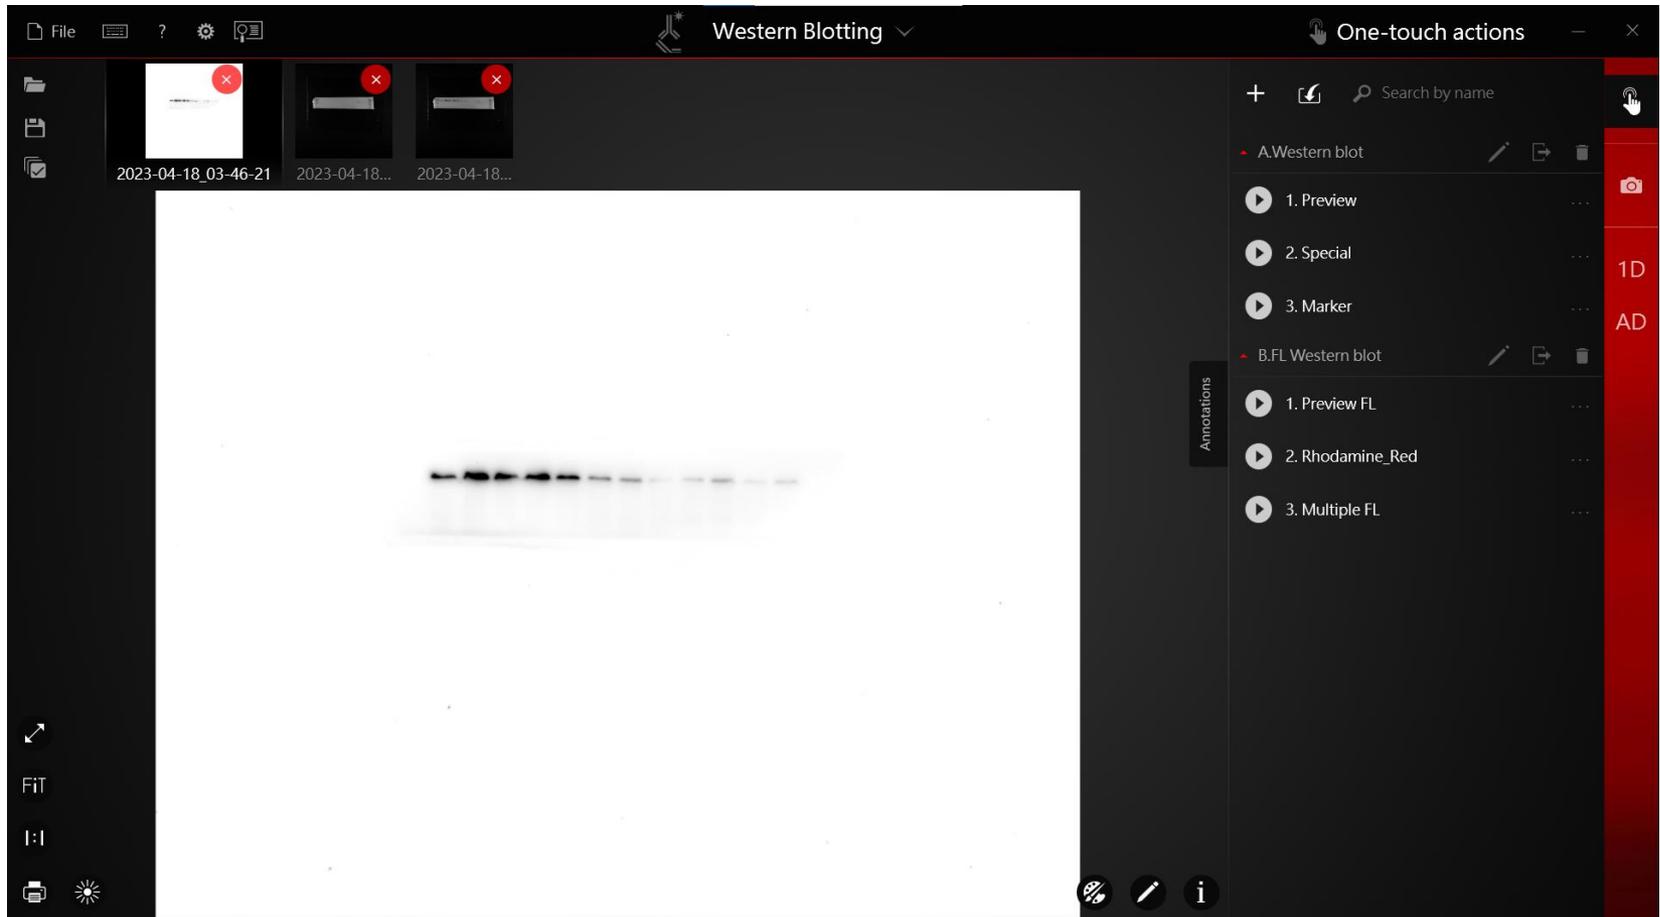

- 一鍵巨集拍攝, 可同時擁有: (1) 樣品影像  
(2) marker  
(3) merge影像

# 冷光拍攝-預覽(Preview)

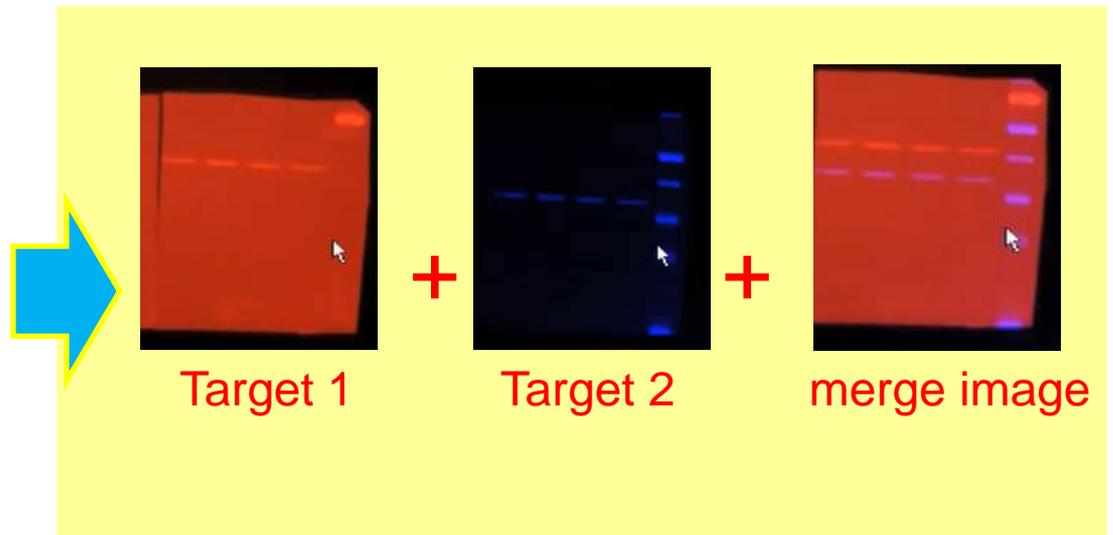

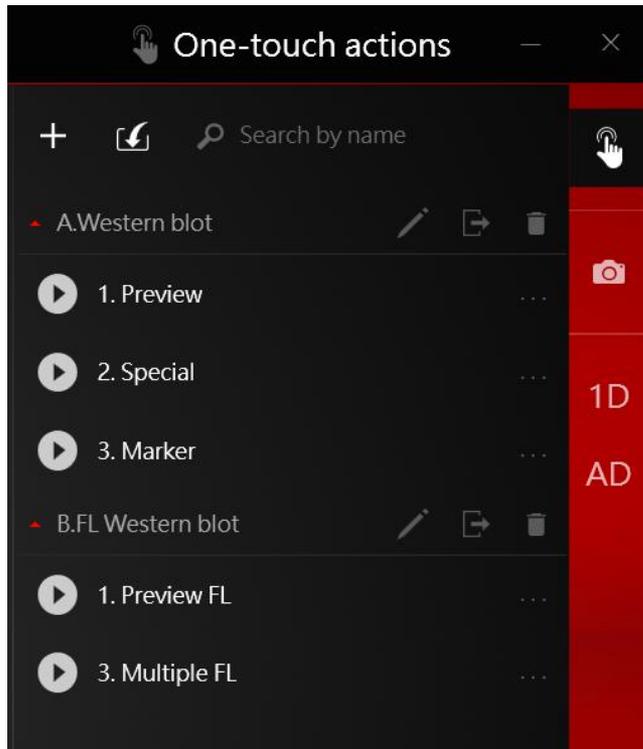

# 冷光拍攝-連拍模式(Special)

Special → Stack (累積訊號)

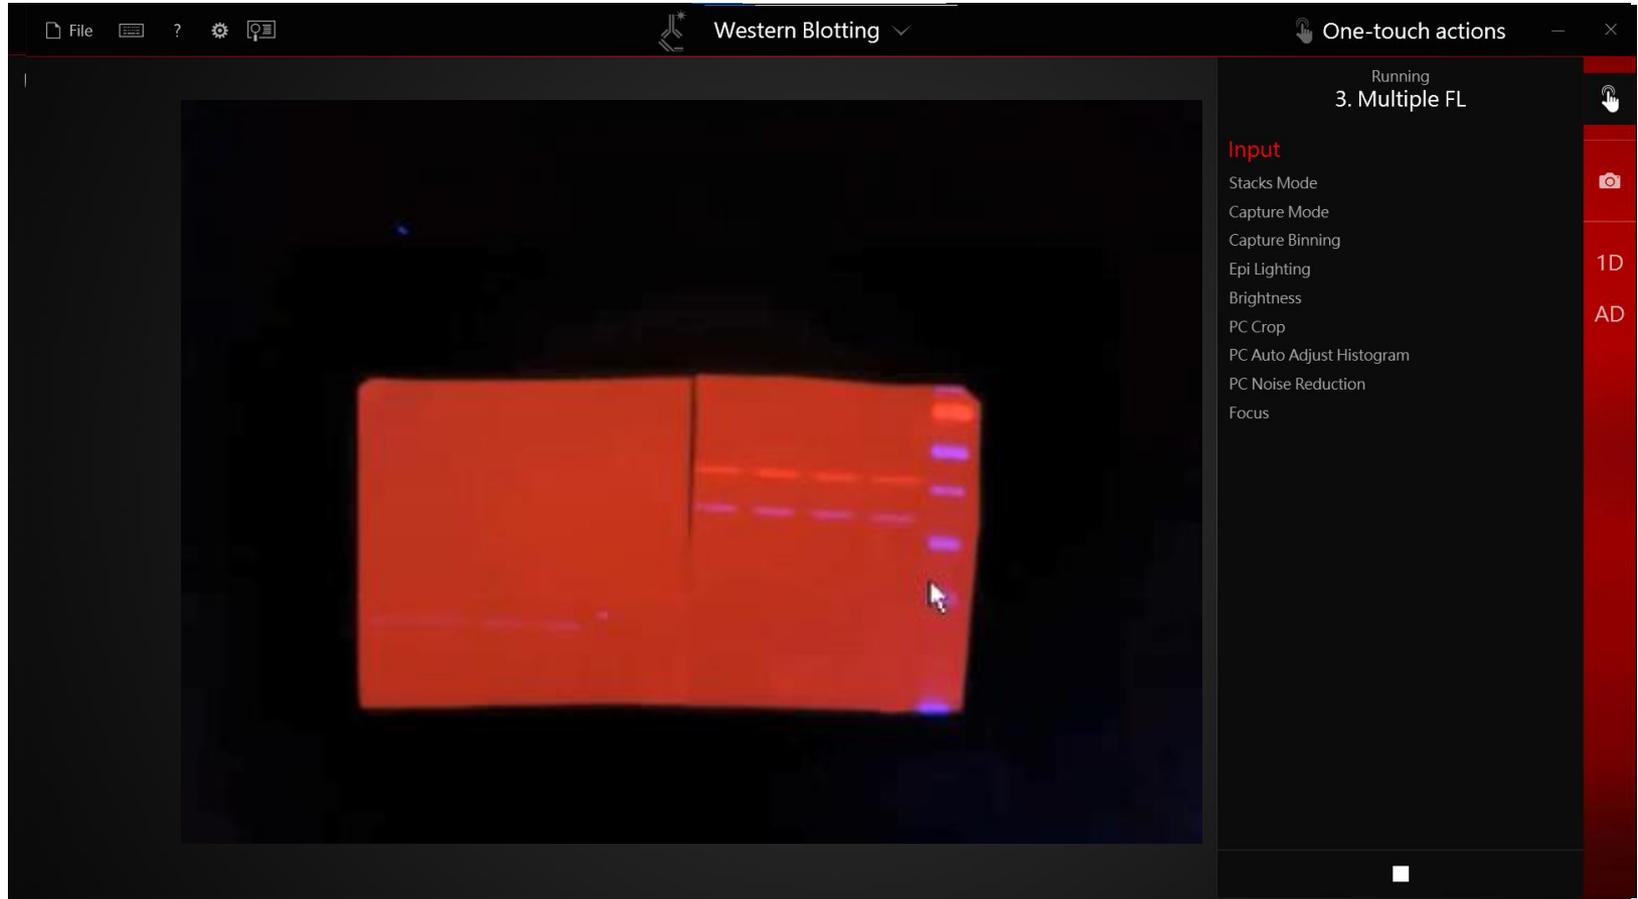

# 螢光拍攝

- 一鍵巨集拍攝, 可同時擁有: (1) 樣品1影像  
(2) 樣品2影像  
(3) merge影像

# Colony Count (1)

The screenshot displays the 'Colony Count' software interface. On the left, a petri dish image is shown with a 'Colony Sample' thumbnail above it. A red arrow points from the text 'Colony Counting分析' to the 'Colony Count' option in the central menu. The menu includes: Home, Protein Gels, Nucleic Acid Gels, Western Blotting, and Colony Count. On the right, a zoomed-in view of the software's analysis tool is shown. A red box highlights a dashed circle selection tool, with the text '框選欲分析的範圍' (Select the range to be analyzed) below it. Below this, another red box highlights a circular area with red dots and the text 'Define no. of classes' (Define the number of classes). At the bottom right, the text '自動計數與偵測菌落種類' (Automatic counting and detection of colony types) is displayed. The interface also features a top menu bar with 'File', a search icon, and a 'Colony Count' dropdown. A bottom toolbar contains icons for zooming, fitting, and information.

# Colony Count (2)

The screenshot displays the Colony Count software interface. The main window shows a petri dish with numerous red square markers representing colonies. The software's control panel on the right includes a top status bar showing '123 Colonies: 123' and '1 Class: 1'. Below this, there are buttons for manual colony addition and subtraction, labeled '手動新增菌落' (Manual Add Colony) and '手動刪除菌落' (Manual Remove Colony). The 'Annotations' section contains sliders for 'Circularity 50%' and 'Size 20 px', with the label '設定菌落計數的圓度與大小' (Set colony count circularity and size) pointing to them. At the bottom of the control panel, there are three main buttons: 'Define Classes...', 'Report...' (highlighted with a red box and labeled '產生分析報告' (Generate analysis report)), and 'Delete Analysis'. The software title bar reads 'Colony Count'.
